NIQUAT BKC		
About	Niquat BKC is an aqueous solution of dodecyl dimethyl benzyl ammonium chloride. It is an almost water white to slightly yellowish liquid. Niquat BKC is available in 50% w/w and 80% w/w concentrations	
Formula	$C_{12}H_{25}(CH_3)_2NC_6H_5CH_2Cl$	
CAS No	8001-54-5	
Applications	Niquat BKC is made from more than 97% C12 alkyl dimethyl amines to ensure highest effectiveness as a biocide. It has wide ranging applications as biocide including disinfectant formulations for skin, toileteries and as a inhibitor for microbe induced corrosion. It is also effective as a phase transfer catalyst, and further finds use as a cationic surfactant.	
Specifications	<i>Physical Form</i>	Liquid
	<i>Colour</i>	Clear Liquid
	<i>active Content</i>	50-80% w/w as per requirement
	<i>pH</i>	6.5-8.0
Packing	50 kg carboy / 200 kg Drums (HDPE)
